SUMMARY

Front-end focused software engineer with 6+ years of experience building scalable, customer-facing web applications. Deep expertise in React and modern UI systems, with a track record of delivering high-impact features at AWS and Oracle. Strong in cross-functional collaboration, accessibility, and developer velocity.

EXPERIENCE

Oracle — Senior Software Developer (Remote)

Aug 2022 – Sept 2023

- Defined API contracts and data models with backend engineers for Oracle Alloy Operator Console, an enterprise cloud platform.
- Led design and implementation of 5 UI workflows for pricing list management and rule configuration.
- Built end-to-end testing and canary deployments; led VPAT accessibility review and inclusive UI standards.
- Mentored 4 junior engineers and drove team execution through code reviews and stand-ups.

Automox — Senior Software Engineer (Remote)

Jul 2021 – Jan 2022

- Led design and requirements for a new product initiative, aligning cross-functional stakeholders.
- Architected and implemented REST services with Spring Boot and PostgreSQL.

Amazon Web Services — Front-End Engineer (Seattle, WA)

Apr 2018 – Jun 2021

- Developed React-based web applications for the Elastic Beanstalk and App Runner consoles used by 100K+ customers.
- Designed reusable UI components adopted across multiple AWS services and improved consistency with shared libraries.
- Owned deployment pipelines across 18 regional stages and increased release confidence with Cypress automated tests.

Amazon — Software Development Engineer in Test (Seattle, WA)

Jul 2017 – Apr 2018

- Built scalable Selenium automation frameworks for Kindle storefront testing.
- Created a serverless test reporting platform using Lambda, API Gateway, and DynamoDB.

JPMorgan Chase — Application Developer (San Francisco, CA)

Jul 2016 – Jul 2017

- Developed customer-facing web components with JavaScript, CSS, and Node.js.
- Delivered production features through CI/CD pipelines using Jenkins and Nightwatch.js

PROJECTS & PROFESSIONAL DEVELOPMENT

- Built williapa.github.io/glinski, a serverless real-time multiplayer chess platform designed for live-stream interaction.
- Explored AI-assisted development workflows, applying test-driven development to reliably iterate on front-end systems.
- Created and published music and video visualizers, strengthening design sensibility and artistic intuition.

SKILLS

Technologies: React, AngularJS, TypeScript, JavaScript, Node.js, Java, CSS, Spring Boot, REST APIs, PostgreSQL, DynamoDB, Lambda, API Gateway, EC2, S3, CloudWatch, CloudFormation, Cypress, Playwright, Selenium, Jest, Kubernetes, Docker, CI/CD, accessibility, canary deployments

EDUCATION

The Ohio State University — B.S. Computer Science, 2016
